The only control products you need for your automation applications

Compact 800 is a family of products that can be used individually or combined to create cost-effective control solutions to fulfill a wide range of user needs.

Compact 800 includes the following:

- A full-featured, application-ready Human Machine Interface (HMI)
- A stunning new series of tough, high-resolution operator panels for interaction with control applications
- Scalable process PLCs with choice of speed, memory and availability
- Engineering software with easily extended, reusable libraries and six programming languages
- Comprehensive and robust I/O modules with easy and space-saving installation

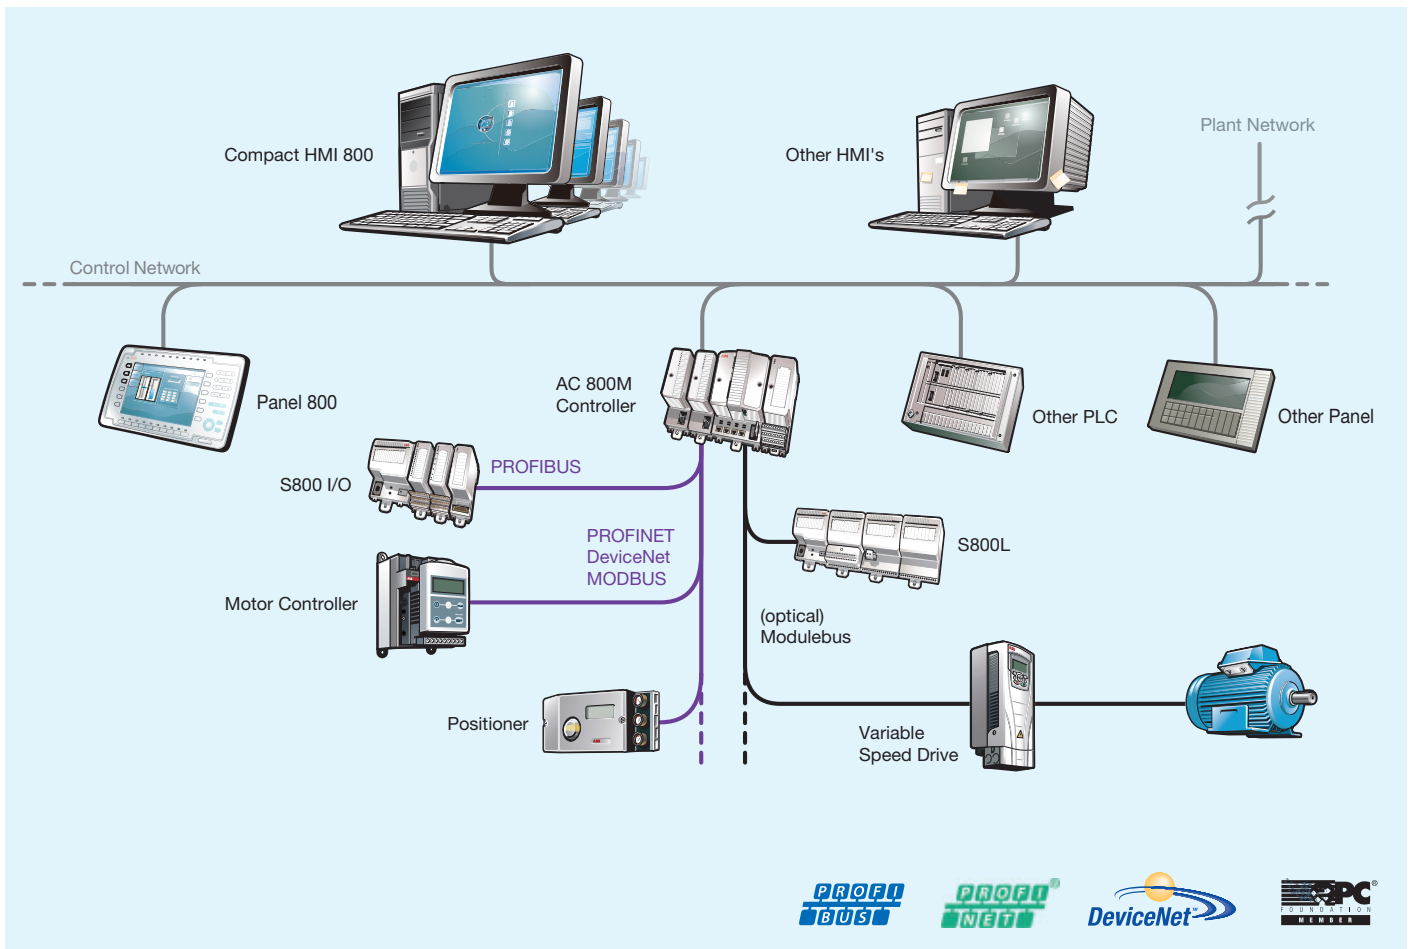

Control a wide range of applications

The products work individually or in combination, smoothly controlling a broad spectrum of industrial applications.

All components are built with openness in mind. All are based on standards that ensure they can be operated with other control and PLC products on the automation market.

Compact 800 – the simple and cost-effective way to improve production, maximize availability and minimize maintenance.

Compact 800 topology

Compact 800 is a family of products that are suitable to be used individually or combined to fulfill any automation need. The AC 800M process PLC can be connected to the field using the S800L or S800 I/O systems or be combined with any PROFIBUS based I/O system on the market. The Compact HMI 800 can be used together with the AC 800M or with any other process PLC or equipment on the market. The communication uses e.g. the powerful features of the OPC standard. The Panel 800 is a panel HMI suitable for local plant floor operation or for machine level applications. Panel 800 connects to a very wide range of PLCs and equipment via the wide range of built in drivers.

When using Compact 800 there are multiple communication options:

- Ethernet
- OPC
- PROFIBUS
- MODBUS RTU, TCP
- ABB's; Modulebus, MB300, SattBus, COMLI,...

Redundancy is available in all critical areas of the AC 800M process PLC and I/O subsystem. These include control networks, field buses, internal buses, power supplies, CPUs and I/O.

Compact HMI 800 can be connected to AC 800M or third-party PLC-type controllers. It enables the remote connection of controllers and PLCs in single as well as in redundant systems. Combine all parts of Compact 800 and get some additional advantages like integrated alarm handling, or use one part and integrate it with a third-party product.

Compact HMI 800 5.1

The Compact HMI 800 minimizes the effort involved in handling HMIs for PLCs and other types of controllers, from operations, maintenance and engineering perspectives. With the new Compact HMI 800 easy installation, you can start working with signal handling and graphics within approximately 30 minutes.

As you connect your clients to the network they are ready to be used as Operator Workplaces. Your Operators benefits from the one click to information access when requiring additional information in any area of interest. Scheduled backups on a separate disc remove your worries about securing your data.

Compact HMI 800 is designed to the Windows standard of interaction, supplemented with an information-centric object structure, reflecting the information in the factory or plant.

Equipment in the plant is available in the system with all its associated information, be it operational status information, technical specifications, drawings, alarm lists, trends, face-plates, tag data sheets, reports, etc.

PLC's are normally connected to Compact HMI 800 via OPC technology. Since the HMI system has a built-in OPC client, finding and connecting the PLC tags and properties is a simple and fast process. For larger configurations however, the built-in, Excel-based, Bulk Data Manager is recommended for efficiency's sake.

Compact HMI 800 supports all OPC servers on the market, meaning that any encapsulated PLC driver with an OPC interface can be connected. Connection to ABB's AC 800M process PLCs is particularly easy thanks to the inclusion of the Compact Control Builder.

Panel 800 5.1

Panel 800 is a user-friendly, intuitive and ergonomic operator panel that combines slim, space saving dimensions with a comprehensive range of advanced functions.

All panels are equipped with advanced functionality for process and equipment control, maneuvered either by function keys located next to the screen or by touching the LCD display. Combined with market leading performance and stunning graphical ability, the Panel 800 erodes the line between ordinary Operator Panels and PC based HMIs. Panel 800 is the successor after the Process Panels.

Panel 800 is designed specifically for ABB Control Network and AC 800M controllers, but thanks to the extensive driver

library, the Panel 800 is compatible with most makes of PLC and ABB legacy control systems. When using it together with AC 800M, certain unique features become available, such as integrated alarm handling with the process PLCs.

Panel 800 consists of a modern powerful hardware platform, which enables a very limited mounting depth. The frame is made of powder-coated aluminum, giving the panels a very robust look-and-feel. The front enclosure is designed to withstand demanding industrious usage according to the IP66 standard. The panels have also been certified by DNV and UL.

Compact Control Builder AC 800M 5.1

The Compact Control Builder, is a powerful tool for creating control solutions and reusable control libraries for the AC 800M process PLC.

It is all done in a Windows-based environment, offering a wide range of control functionality for ABB's industrial AC 800M. From binary logic to advanced regulatory control, from discrete process signals to high-level process objects. In any choice of no less than six programming languages, whichever are the most suitable for the tasks at hand. These are: Instruction List, Structured Text, Function Block Diagram, Sequential Function Chart, Ladder Diagram, and Control Modules, the latter being ABB's own contribution to higher application engineering efficiency and ease of use.

The Compact Control Builder product package also includes an AC 800M OPC-server and a soft-controller for testing of the applications.

AC 800M Processor Units

The AC 800M process PLC can be configured with both Compact Control Builder and 800xA Control Builder.

When configured with the Compact Control Builder the AC 800M is open to participate in any kind of control solution.

When configured with the 800xA Control Builder, the AC 800M becomes a tightly integrated part of the 800xA DCS. It is then offered and also described as a part of the 800xA system offering.

CPU Modules

Several CPU modules are available that vary in terms of processing power, memory size, and redundancy support. Each CPU module is equipped with built in Ethernet port(s) for communication with other process PLCs and for interaction with operators, engineers, managers, and higher level applications. These ports can be configured for redundancy for those cases where availability is of paramount importance. It is also equipped with two RS-232C ports that can be used for point-to-point communication with programming/debugging tools and with third-party systems and devices.

Com and I/O Modules

To each CPU module, a number of communication and I/O modules can be added, for example:

- Additional RS-232C ports
- PROFIBUS DP, DP-V1 interface
- MODBUS TCP interface
- ABB INSUM interface
- MasterBus 300 interface
- S100 I/O interface
- S800L and S800 I/O modules

S800 I/O Modules

S800 I/O is a comprehensive, distributed and modular process I/O system that communicates with parent controllers over industry-standard field buses. Thanks to its broad connectivity it fits a wide range of process controllers from ABB and others.

By permitting installation in the field, close to sensors and actuators, S800 I/O reduces the installation cost by reducing the cost of cabling. And thanks to features such as “hot swap” of modules, “on-line” reconfiguration and redundancy options, it contributes to keeping production – and thereby profits up.

S800L I/O Modules

S800L

S800L I/O is a comprehensive, distributed and modular process I/O system that communicates with parent controllers over industry-standard field buses. Thanks to its broad connectivity it fits a wide range of process controllers from ABB and others.

With its cost-effective design and just 59 mm depth installation, S800L I/O modules are the perfect choice for PLC applications. Robust mechanics, one-piece handling, easy mounting and smart connections save your time in all phases of installation. Configuration with the AC 800M controller is as easy as can be, since all necessary information is preinstalled with the Compact Control Builder. And, with the GSD file, S800L I/O can be used with any control system.

Furthermore, as S800L I/O is a subset of the comprehensive S800 I/O system with more than 8 million channels installed globally, you enjoy the same full-featured signal interfacing and high availability.

AI820	Differential inputs, 4 ch., 0(1)-5 V, $\pm 0(2)$ -10 V, $\pm 0(4)$ -20 mA, 14 bits + sign.
AI825	Individually galvanically isolated channels, 4 ch., $\pm 0(2)$ -10 V, $\pm 0(4)$ - 20 mA, 14 bits + sign.
AI830A	RTD inputs, 8 ch., Pt100, Ni100, Ni120, Cu10, resistor 0-400 ohms, 14 bits, 3-wire.
AI835	TC inputs, 8 ch., (7+ ref. junction), separate returns. TC types B, C, E, J, K, N, R, S, T, - 30...75 mV, 15 bits.
Analog output modules	
AO810	8 channels, common return, 0(4)-20 mA, 14 bits, load: 850 ohms (short-circuit-proof).
AO820	Isolated output. 4 ch., separate returns, measuring range: $\pm 0(2)$ -10 V, $\pm 0(4)$ -20 mA, resolution: 12 bits + sign, load: less than 500 ohms (current) / more than 2 kohms (voltage), short-circuit-proof.
I/O modules with intrinsic-safety interface	
DI890	8 ch., separate returns, proximity sensors (NAMUR) or voltage-free contact., current sink, wire-fault detection.
DO890	4 ch., separate returns, load 150-5000 ohms, 11 V @ 40 mA, current source, wire-fault detection, short circuit-proof.
AI890	8 ch., single-ended, 0(4)-20 mA, 12 bits, transmitter power supply.
AI893	8 ch., TC: 7 + ref. junction, sep. returns. TC types B, C, E, J, K, L, N, R, S, T, U, -10...80 mV. RTD: Pt50-1000, Ni100-500, Cu10-100, resistor 0-4000 W, 3-wire. 15 bits + sign.
AI895	8 ch., single-ended, 4-20 mA, 12 bits, transmitter power supply, HART pass-through not supported.
AO890	8 ch., common return, 0(4)-20 mA, 12 bits, load: 750 ohms short-circuit-proof.
AO895	8 ch., common return, 4-20 mA, 12 bits, load: 750 ohms short-circuit-proof, HART pass-through not supported.
S800 I/O modules for redundancy	
DI840	16 channels, common return, 24 V d.c., current sink, extended diagnostics.
DP840	8 ch., sep. returns, freq. measurement or pulse counting, 0.5-20 kHz, 12/24 V d.c or NAMUR.
DO840	16 ch., common return, 24 V d.c., max. 0.5 A, current source, short-circuit-proof, extended diagnostics.
AI843	TC input, 8 ch. + ref. junction. TC types: B, C, E, J, K, L, N, R, S, T, U, -30...75 mV, 16 bits, extended diagnostics.
AI845	8 ch., common return, 0(4)-20 mA 0(1)-5 V, extended diagnostics, HART pass-through not supported.
AO845	8 ch., common return, 4-20 mA, extended diagnostics, HART pass-through not supported.

Field Communication Interface

CI801 PROFIBUS DP-V1 Communication Interface

Including:

- 1 pce Power Supply Connector.
- 1 pce TB807 Modulebus Terminator.

The basic system software loaded in CI801 does not support the following I/O modules: DI830, DI831, DI885, AI880A, DI880 and DO880.

CI801 Engineering kit SW1.3

Including:

- 1 pce CD with GSD file, Memory Maps and Release Note.
- 1 pce Reference Manual Memory Maps for CI801.

CI840A PROFIBUS DP-V1 Communication Interface

For 1+1 redundant operation.

Two CI840A and one TU847 or one TU846 must be ordered.

The basic system software loaded in CI840 does not support the following I/O modules: DI830, DI831, DI885, AI880A, DI880, DO880 and ABB Drives.

CI840 Engineering kit SW 4.0

TU846 Module Termination Unit, MTU, for 1+1 CI840

Support for redundant I/O. Vertical mounting of modules.

Including:

- 1 pce Power Supply Connector.
- 2 pce TB807 Modulebus Terminator.

	Support for	Article no.	
TU846 MTU for 1+1 CI840	Redundant I/O	3BSE022460R1	

TU847 Module Termination Unit for 1+1 CI840

Support for non-redundant I/O. Vertical mounting of modules.

Including:

- 1 pce Power Supply Connector.
- 1 pce TB807 Modulebus Terminator.

S800 I/O Analog Input Modules

AI810 Analog input 1x8 channels

0(4)..20m A, 0..10 V, 12 Bit, single ended, 0.1%, Rated isol. 50 V.

Use Module Termination Unit TU810, TU812, TU814, TU830, TU833, TU835, TU838, TU850.

		Article no.
AI810	1x8 channels	3BSE008516R1

AI815 Analog input 1x8 channels with HART

0(4)..20m A, 0(1)..5 V, 12 bit, single ended, 0.1%, Rated isol. 50 V. Current limited transmitter power distribution. Use Module Termination Unit TU810, TU812, TU814, TU830, TU833, TU835, TU838, TU850.

		Article no.
AI815	1x8 channels	3BSE052604R1

AI820 Analog input 4x1 channels

± 20 mA, 0(4)..20 mA, ± 10 V, ± 5 V, 0(1)..5 V, diff., 50 V CMV, 14 bit + sign. Rin (curr) 250 Ohms, Rated isolation 50 V.

Use Module Termination Unit TU810, TU812, TU814, TU830, TU833.

		Article no.
AI820	4x1 channels	3BSE008544R1

AI825 Analog Input 4x1 channels Galvanically isolated

-20..20 mA, 0(4)..20 mA, -10..10 V, 0(2)..10 V, Galvanically isolated channels.

14 Bit + sign, 0.1%, Rated isol. 250 V.

Use Module Termination Unit TU811, TU813, TU831.

		Article no.
AI825	4x1 channels	3BSE036456R1

AI830A Analog input 1x8 channels RTD

Pt100, Ni100/120, Cu10, R, Rated isol. 50 V.

Use Module Termination Unit TU810, TU812, TU814, TU830, TU833.

		Article no.
AI830A	1x8 channels	3BSE040662R1

AI835A Analog input 8 channels Thermocouple/mV

Rated isol. 50 V.

Use Module Termination Unit TU810, TU812, TU814, TU830, TU833.

		Article no.
AI835A	8 channels	3BSE051306R1

S800 I/O Analog Input Modules

AI843 Analog Input. Redundant or Single 1x8 channels Termocouple/mV

Rated isol. 50 V.

Use Modules Termination Unit TU830, TU833, TU842, TU843

		Article no.
AI843	1x8 channels	3BSE028925R1

AI845 Analog Input. Redundant or single 1x8 channels HART

0(4)..20 mA, 0(1)..5 V, 12 bit, single ended, 0.1%, Rated isol. 50 V. Current limited transmitter power distribution. Advanced on-board diagnostics.

Use Module Termination Unit TU810, TU812, TU814, TU830, TU833, TU835, TU838, TU844, TU845.

		Article no.
AI845	1x8 channels	3BSE023675R1

AI890 Analog Input 1x8 channels with Intrinsic Safety Interface

0 (4)...20 mA single ended 0,1%. Rated isol. 50 V.

Use Module Termination Unit TU890 or TU891.

		Article no.
AI890	1x8 channels	3BSC690071R1

AI893 Analog Input 8 channels. Temp. measuring. Intrinsic Safety Interface.

For TC and RTD sensors. Rated isol. 50 V.

Use Module Termination Unit TU890 or TU891.

		Article no.
AI893	8 channels	3BSC690141R1

AI895 Analog Input 1x8 channels with Intrinsic Safety and HART.

4...20 mA single ended 0,1%. Rated isol. 50 V.

Use Module Termination Unit TU890 or TU891.

S800 I/O Analog Output Modules

AO810V2 Analog Output 1x8 channels, 0(4)...20 mA

0(4)..20 mA, 14 bit RLmax 500/850 Ohms, Rated isolation 50 V.
Use module Termination Unit TU810, TU812, TU814, TU830 or TU833.

		Article no.
AO810V2	1x8 channels	3BSE038415R1

AO815 Analog Output 1x8 channels with HART

4..20 mA, 12 bit, 0.1%, RLmax 750 ohm, Rated isol. 50 V.
Use Module Termination Unit TU810, TU812, TU814, TU830 or TU833.

		Article no.
AO815	1x8 channels	3BSE052605R1

AO820 Analog Output 4x1 channels

± 20 mA, 0(4)...20 mA, ± 10 V, 12 bit + sign. Indiv. isol. ch. RL max 500 Ohms, Rated isol. 50 V.
Use Module Termination Unit TU810, TU812, TU814, TU830, TU833.

		Article no.
AO820	4x1 channels	3BSE008546R1

AO845A Analog Output Redundant or single 1x8 channels HART

4..20 mA, 12 bit, 0.1%, RLmax 750 ohm, Rated isol. 50 V.
Advanced on-board diagnostics.
Use Module Termination Unit TU810, TU812, TU814, TU830, TU833, TU842, TU843.

		Article no.
AO845A	1x8 channels	3BSE045584R1

Module Termination Units

Module Termination Unit, MTU, for redundant applications, 50 V

- TU842 Used for AO845, DI840, DO840. Horizontal mounted DIN rail. Rated isolation 50 V.
- TU843 Used for AO845, DI840, DO840. Vertical mounted DIN rail. Rated isolation 50 V.
- TU844 Used with AI845, AI880 and DP840. Horizontal mounted DIN rail. Rated isolation 50 V. Shunt Stick not included.
- TU845 Used with AI845, AI880A and DP840. Vertical mounted DIN rail. Rated isolation 50 V. Shunt Stick not included.

Compact 800 Software Management Program

ABB's Compact 800 software is continuously enhanced and further improved. Automation Sentinel is the software management program for our Compact 800 products and the easiest way to profit from these improvements. It is intended to help customers manage and maintain their system software to take advantage of the continuous improvements and enhancements being made to our software. A twelve (12) month Sentinel agreement starting with the date of shipment from the factory is included with each new Compact 800 software delivery. This twelve (12) month agreement will automatically be extended an additional six (6) months if customer contact information is provided as indicated in the Automation Sentinel Product guide. In addition to this, the base subscription now includes a limited number of technical support hours. The amount of hours provided is based on the system type as described below. These hours are being provided to support the customer for any updates or upgrades they receive during the validity of the subscription.

Also included with the Sentinel subscription is a Solution Bank Sentinel subscription, this will provide customers with auto notification of new releases, techinfobank, on-line documentation and downloads.

Before the agreement expires a Sentinel renewal needs to be ordered to continue receiving updates to the existing software and maintain the option of evolution in the future. These renewals are valid for a period of 12 months and run consecutively from the previous subscription. Failure to renew the Sentinel subscription will cause all updates and enhancements to our software to no longer be provided to the customer. Once the subscription has expired the options to rejoin the Automation Sentinel program is the purchase of Sentinel using the buy-in program in effect at the time or the purchase of new system software.

Articles for Automation Sentinel Renewal Program are listed below. If you need more information or information about other Automation Sentinel Programs please contact your local sales person or visit www.abb.com/controlsystems.
